

THE INNOVATION

## 3D WALLPAPER

*Walls are coming alive with texture, thanks to this revolutionary wallcovering*

Wallpapers with texture or folded detailing have now been surpassed by wallcoverings that are truly three-dimensional. The 'Mirabilia' collection by Eindhoven-based 'material research and design studio' Alissa + Nienke bridges the gap between art and functional wall decoration, protruding into the room with delicately cut shapes. The duo behind the brand incorporate their experiences working with craftspeople and technology into their wallpapers,

aiming to trigger 'interaction and curiosity'. The designs draw on natural forces, such as wind and light, with the patterns casting intriguing shadows or rippling like leaves in a breeze. Alissa + Nienke has created sculptural walls for big names in fashion, from Fendi and Dior to Rossana Orlandi, as well as working on private homes. Each piece is bespoke, and its colour and design can be customised. From £372 per square metre ([alissanienke.nl](http://alissanienke.nl)).
